

FOR IMMEDIATE RELEASE

**BOARDEVALS DEMONSTRATES COMMITMENT TO GREEN,
ENVIRONMENTALLY-FRIENDLY BUSINESS PRACTICES**

Provider of Board Evaluation Solutions Joins
One of the Country's Leading Carbon Offset Programs

El Dorado Hills, Calif. – May 8, 2009 – BoardEvals, LLC, a provider of web-based board evaluation tools, today announced that it is offsetting its carbon emissions with Carbonfund.org, one of the country's leading carbon offset organizations. By joining Carbonfund.org's CarbonFree[®] Partner program, BoardEvals has joined a national movement of businesses and organizations that are leading the fight against global warming.

Carbonfund.org's CarbonFree[®] Partner program supports renewable energy, energy efficiency, and reforestation projects in the U.S. and abroad to reduce CO₂ pollution and help accelerate our transition to a clean energy future.

“BoardEvals is committed to being an active, responsible partner within our community,” said Jim Schraith, Founder and President of BoardEvals. “Part of this commitment includes taking a leadership role in green, environmentally-friendly business practices, and this program is one of the steps we are taking to achieve that objective.”

BoardEvals provides web-based evaluation solutions that help corporate and nonprofit organizations perform more efficient, effective and thorough board evaluations. BoardEvals replaces the ad-hoc, manual processes used by most organizations today with an automated, standardized board evaluation process that saves time and expenses, while improving overall governance practices.

Founded in late 2008, BoardEvals is currently testing and refining its solution with a limited set of Beta customers. Later this year, BoardEvals will formally launch, and broadly deploy, a production version of the service.
